### ***Press Statement***

## **Indian Diaspora Council (IDC) in Solidarity with Earth Day**

The **Indian Diaspora Council (IDC)** joins in solidarity with its global affiliates and membership, other organizations, institutions, agencies, and individuals globally in supporting the international awareness of Earth Day and its 2018 campaign to *End Plastic Pollution*.

### **Earth Day 2018 - April 22, 2018**

*“Plastic pollution is poisoning our oceans and land, injuring marine life, and affecting our health! Earth Day 2018 is dedicated to providing the information and inspiration needed to fundamentally change human attitude and behavior about plastics. Earth Day Network is working to secure a future free of plastic pollution”.* <https://www.earthday.org>

*“Education is the foundation for progress. We need to build a global citizenry fluent in the concepts of climate change and aware of its unprecedented threat to our planet. We need to empower everyone with the knowledge to inspire action in defense of environmental protection. Environmental and climate literacy is the engine not only for creating green voters and advancing environmental and climate laws and policies but also for accelerating green technologies and jobs”.*

### **Indian Diaspora Council International (IDC) Statement:**

“Earth sustains all life and must be protected in order for it to continue to provide viable means for sustainable life, health and well being of all its inhabitants, especially as the world population keeps on increasing. Over consumption and over population adversely affect the natural resources and earth’s climate with catastrophic consequences. It is an increasingly urgent call to action, a commitment of individual and collective responsibility, obligation and duty for environmental literacy and awareness from the early stages among children as well as among adults, professionals, businesses, institutions, agencies and officials. Our legacy is intimately linked to protection of earth and its environment for a sustainable future and that is undeniable and indisputable. While economic progress is important, it is vital that all sectors of society, as a collective partnership, make this collective commitment for earth’s sustainable future. We live and share in earth’s bounty of life sustenance and we have a responsibility to do that which we must to protect it as well.”
